

## PLATFORM OVERVIEW

### Leading multi-unit operators use Zenput to elevate team execution in every store

By automating how operating procedures, public health and food safety protocols, and other key initiatives are rolled out and enforced, Zenput turns strategy into action faster and equips teams to deliver on it.

Consistent execution across an entire operation—whether it spans tens, hundreds, or thousands of locations—is increasingly difficult to achieve. A few reasons for this are:

#### Adapting quickly to change is hard

Operators struggle to align the work happening in the field and stores with what's most important to the organization now.

#### Lack of visibility into day-to-day quality

With critical work that needs to be coordinated on a daily basis, operators aren't certain that tasks and procedures are performed correctly and on time.

#### It's unclear where to focus to improve

Limited insights into store and field performance mean that operators don't know where to invest and focus their efforts.

## Elevate team execution in every store

Zenput makes every field and store employee more productive and better equipped to do their jobs well. Zenput enables operations leaders to:

### Communicate quickly and effectively

Boost operational agility by quickly deploying strategic initiatives, important announcements, and procedural updates – and ensure that stores are aligned with them.

### Ensure quality execution in every store

Equip your teams with the tools needed to operate at a higher level and more productively, with clear visibility for management into the work being done.

### Improve the business, faster

With real-time insights into what's happening in your stores, ops leaders identify and address operation-wide issues earlier and unlock opportunities to grow the business.

## The Zenput Impact

### Execution Quality

**20%** External/3rd party audit scores

**24%** Compliance issues

### Workforce Efficiency Gains

Store

per field manager  
(And 2+ more stores covered!)

HQ

**10+ hours/week**  
at HQ

## The Zenput Operations Execution Platform

Powering operations for the world's best brands

Zenput has been instrumental in our ability to elevate our employee and customer safety. And from a food safety perspective, it's probably the best insurance that we can have to really ensure that execution of very important and critical procedures are occurring.

**Raul Lepe**, VP of Strategic Planning & Ops Services,  
Diversified Restaurant Group (*Taco Bell Franchisee*)

## Platform Capabilities

Zenput puts these capabilities in the hands of everyone responsible for the success of your stores

### Task Management

Whether it's a one-time product roll-out, a monthly quality audit, or a daily opening checklist, schedule all the tasks that need to get done. Provide your stores the prescriptive guidance they need to operate smoothly, stay ahead of quality issues, and deliver great experiences for customers.

Chipotle

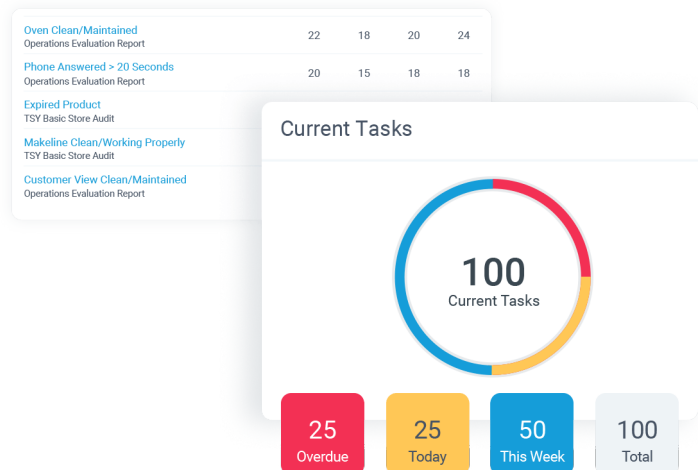

## Incident Management

Gather real-time information about incidents from employees out in the field, automate notifications to alert management, and track resolution. Empower your team by providing an easy way to capture photos and send reports through their mobile device.

## Operational Intelligence

Evolve your strategy and make informed decisions by analyzing employee, store, or team performance to identify strong performers and uncover potential areas for improvement. Explore trends to surface issues that require intervention.

Zenput has totally changed how we run our business. We've gotten many of our different departments involved in it too, so this has become a central platform for operating our stores.

Gary Rasmussen, Director of Training,  
Timewise

## The Zenput Connected Store

Track compliance against all your food safety protocols and the quality of work being done to uncover critical issues and focus attention where it's needed most to catch potential problems early.

### Temperature Monitoring

Automate temperature monitoring and instantly send notifications if food or equipment temperatures go out of range

- ✓ Communicate safe holding temperatures to your teams
- ✓ Save employees 60+ minutes per store per day
- ✓ Track trends, make temperature adjustments, and reduce food waste

### Food Prep Labeling

Simplify critical steps of food preparation while saving employees time and improving food safety compliance

- ✓ Ensure labels have accurate expiration dates and details
- ✓ Save employees 30-60 minutes per shift
- ✓ Track labeling to ensure labels are correct and get insights into food preparation

## The Zenput Difference

Here's why Zenput is uniquely positioned to help you improve store operations and customer experiences:

### Central hub for operations

The single source of truth for the execution of operational initiatives and procedures. Zenput gives management insights into the entire organization's execution of critical initiatives and procedures.

### Actionable insights at your fingertips

With Zenput, you get relevant analytics and reporting (based on where you sit in the org) on the execution of critical procedures and initiatives at your fingertips.

### Scale and security

The Zenput platform is built with scale and security in mind to support the needs of small-to-medium operators as well as large, complex enterprises.

### Purpose-built for the restaurant, c-store, and grocery industries

With a deep understanding of the organizational structures, food safety requirements, and business needs in these industries, Zenput is uniquely positioned to support your business today and in the future.
