## Zenput for Restaurants

### Elevate team execution in every store

Restaurant operators use Zenput to automate how operating procedures and key initiatives are rolled-out, tracked, and enforced. Zenput's operation execution platform makes every field and store employee more productive and better equipped to do their jobs well.

### Zenput supports both field and store-level work, including:

- Store Performance Review
- District Manager Store Visit
- Opening/Closing Checklist
- Food Safety Audit
- Temperature Log
- And much more...

Zenput gives our field leaders clear visibility into restaurant operations and trends so they can focus their coaching efforts and improve overall accountability.
