

Platform Overview

Zenput for Retail

Elevate team execution in every store

Retail operators use Zenput to automate how operating procedures and key initiatives are rolled-out, tracked, and enforced. Zenput's operation execution platform makes every field and store employee more productive and better equipped to do their jobs well.

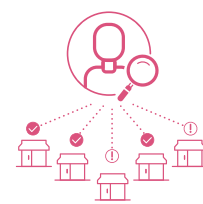

Make everyone more productive

From the teams executing tasks in your stores to the field managers that oversee them, empower your staff to work smarter and more efficiently.

Ensure quality work across the operation

Give your teams the tools they need to operate at a higher level while holding them accountable for doing the job right.

Know what's happening everywhere, from anywhere

Ops leaders have real-time visibility into the work being done in the field and stores so issues are caught and addressed early.
